

UNLIMITED VALUE

Leading practice in Unlimited Value Creation

5th October

The Great Hall, University of Exeter

Leading practice in Unlimited Value Creation is our first Action Research Summit hosted by the University of Exeter Business School. Bringing together academics and senior practitioners from a diverse range of backgrounds to ignite discussion, network and exchange knowledge, the Summit will shape thinking and practice on how libraries, social enterprises and cultural institutions can understand, grow and communicate the diverse value they create within their communities.

You will hear thought-provoking keynotes and insightful 'lightning talks', which invite you into an exchange of ideas and knowledge generation. Help us to build a network for continued, inter-disciplinary conversations on how organizations can create 'unlimited' forms of value, relating to but not bounded by social, cultural, health, wellbeing and economic impacts.

The day is hosted by the University of Exeter Business School, Libraries Unlimited, Open Data Institute Devon and the Real Ideas Organisation. We are working together on a nationally significant Arts Council England-funded research project exploring issues related to how libraries can create and connect social and financial value.
